Jun 15, 2019 Websites using WinPasze ICAO Data WinPasze Category:Sustainable transport Category:Cross-platform softwareThe present invention generally relates to techniques for controlling airflow through a gas turbine engine. More particularly, the present invention relates to a thermal-optic system for use in a gas turbine engine to reduce airflow through the engine. A typical gas turbine engine generally includes a fan section, a compressor section, a combustor section, a turbine section, and an exhaust section. The fan section is typically driven by an engine"'s core engine, and includes an array of fan blades. The compressor section pressurizes air entering the engine and directs the pressurized air
