silicon vlsi technology fundamentals pdf silicon vlsi technology fundamentals pdfQ: jQuery.load() not updating my page I want to update a DIV with HTML code from a.php file but it not updating my page just returning me the old code. Here's my code: $(document).ready(function() { $("#div").load(""); }); A: Try this instead, replace #div with.class to the selector of the div that you want to load data to. $(document).ready(function() { $("#div").load("", function(){ //Do what you want to do to the loaded content. $(this).appendTo(".class"); }); }); EDIT: It seems like you are trying to just append the string to a div. Try this, in stead of using.appendTo() use the.html() function. $(document).ready(function() { $("#div").load("", function(){ $(this).html(this.innerHTML); }); }); Q: how can I publish the text of the same buttons? I need the text of my buttons in my ListView and I did this: ArrayAdapter adapter1; adapter1 = new ArrayAdapter(this,android.R.layout.simple_list_item_1, searchArray); adapter1.setNotifyOnChange(true); adapter1.notifyDataSetChanged(); lv.setAdapter(adapter1); Everything is fine but, how can I display the text of the same buttons? I need this data in my xml like this: 570a42141b
