A: First, I believe this is a Windows question about your OS. Do you still have a copy of windows 10 installed (this was not a mistake; nobody knows which OS you used to install it)? If so, open Task Manager and look for a program with the title DirectSOFT 5 (Build 32). If this is not the case, then there may be other reasons why it is not working. 1) Is your serial code correct? DirectSOFT is very fussy about this. Are you sure it is the correct code? 2) Do you have any plugins/extensions in your browser? You may need to update them to resolve this. 3) Are you using a browser that supports Active Scripting? I'm using Firefox and it works fine for me. As another, this is not a typical error message that I've ever seen before. It's worth investigating. Do you have any alternative applications that use JavaScript? If so, try opening them and see if they give you a similiar error. life under them. Actually they could just sit around with the other little non-pregnant mummies and get food and support from them, it would save them the trouble of having the

actual child. It would probably work like how mummies take care of their wombs so the child would be protected and fed. That was perfect, exactly what was needed. Thanks!
