The series will tell the story of Thomas, his family and his business, J.O.B. Meets. This story is a result of our friendship over the last years and will also showcase the ideas, passion and creativity of our new partners. It is planned to be released in summer 2019. Watch the trailer of the webseries here: the embodiments and features of the present invention, the second and the third embodiments are better. The following are the reasons why: The first embodiment of the present invention is an image processing device, wherein the second embodiment realizes a dynamic constant-time encoding by computing a mean value, using only a single processor. The second embodiment of the present invention is an image processing device, wherein the third embodiment realizes a dynamic constant-time encoding by computing a mean value, using both a first processor that operates at a lower speed and a second processor that operates at a higher speed. The present invention can provide a device that can perform a dynamic constant-time encoding in a device, even when a processor operates at a high speed, in case of a decoding method for a stream compressed by a constant-time encoding.`package com.yj.douban.api.dto.response; import lombok.Data; import lombok.ToString; import java.util.List; /** * Created by yangjunchao on 2017/12/17. */ @Data @ToString(callSuper = true) public class RestGetAccountStateResponse extends RestGetResponse { private List stateList; }`I've been doing great in general.
